

SECONDARY SCHOOLS - TAKE CONTROL OF YOUR BROADBAND SERVICE

**Fast, Cost Effective
Broadband Services for
Secondary Education
with a range of complimentary
services to put you in control**

"Staff confidence using ICT is much improved. They are increasingly using the network to stream media, such as high quality video; something we would of not dreamed of attempting before"

Nichola Eaton
Assistant Head Teacher
Aldridge School - An Academy

DELIVERING FLEXIBILITY, CHOICE & VALUE

Our broadband services come as modular elements to enable you to integrate your own services, or third party services you're happy with. We provide a range of service options to put you in full control of your service and ensure that you can see where all of your budget is being spent.

We don't automatically bundle in lots of services to 'pad out' our pricing, but provide a shopping list of incremental upgrades to enable you to buy just what you need and no more, ensuring that your money is well spent.

All of our services are cloud managed, meaning we can provide an inclusive end-to-end support package, or tailor the support so that you can manage your services where you have capability.

- Full range of security options
- Anti-virus & Anti Spam
- Network Access Control
- Full firewall feature set

Web Filtering

- On-Premise & Off-premise options
- Per User Policy
- Cloud Management/Admin
- Optional End Point Protection

Budget Control

- Cost effective & Competitive
- Capex Option
- Pay Monthly/Quarterly/Annual
- Flexible finance options available

Tips:
 Studies have found that on average, end-user devices consume .1Mbps of Internet bandwidth each. Therefore 100 devices would need approximately 10Mbps. For XDSL, EFM and FttC, Broadband speeds are dependent on line quality and the length from the serving Network node. For more Tips, FAQ and Service details contact us or visit www.wave9.co.uk/waveconnect
