WaveProtect - KCSIE 2023 Compliance Enhanced Safeguarding for Schools

About Us

Wave 9 is one of the UK's most respected IT specialist focusing on the Education Sector. Our core services include Secure Managed Internet Services, Firewalls, Web-filtering, Safeguarding, Network and Telecoms

Features

WaveProtect Enhanced KCSIE reporting includes several options depending on your current circumstances. If you're already using our managed Sophos XGS service with compliant web-filtering then you're already compliant from a web-filtering perspective, but you may want to add on our enhanced reporting service to provide more flexibility and visibility, enable non-technical staff to produce and review reports, and add instant alerting.

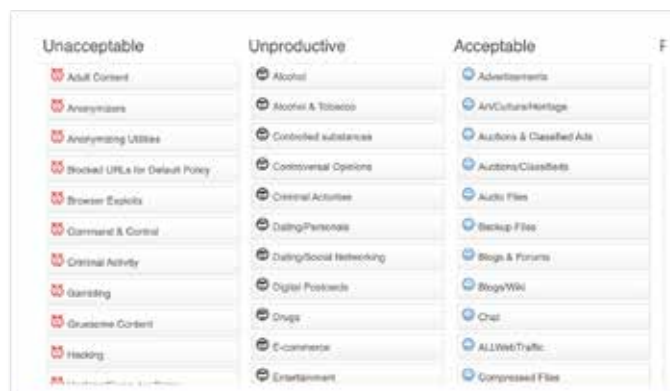

What this means for you

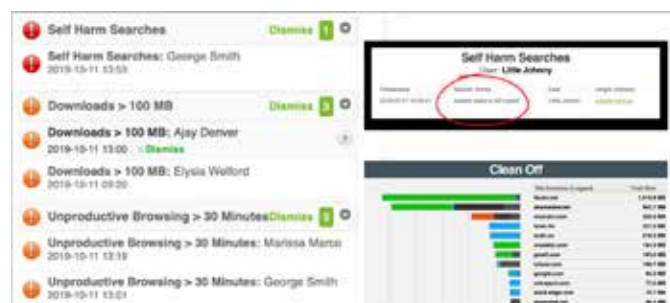

Cost effective, comprehensive reporting to support your safeguarding obligations in an easy and intuitive way. Full compliance with DFE, KCSIE23 and PREVENT requirements.

Enhanced reporting powered by Fastvue:

Analyses all data from the Sophos XGS to produce a comprehensive dashboard and configurable reports for easy analysis by safeguarding leads. Detailed reporting of user activity, blocked searches and policy violations as well as real time alerting give you unparalleled insight.

The Site Clean feature helps reviewers understand the URLs and data they're seeing as it transforms cluttered log data into user-friendly browsing history.

The intuitive toolset means little or no training is required and Wave 9 will assist where needed. Available as a self-install on a customer Virtual Machine, or supplied as a managed service with a Wave 9 appliance. Please ask for details.

Contact us today for more information.
